Microsoft Partner

The mobile app designed to bring **field and office, closer than ever.**

Unlocking the Digital Oilfield

Streamline your oilfield operations with an app meticulously crafted to address the unique challenges of field operators. Cenozon's FIND app allows you to easily **locate assets, perform inspections, and document workflows.** Say goodbye to unnecessary trips to the office by **sharing real-time digital data between the field and office,** and accessing all your paperwork and maps directly within the app, wherever you are.
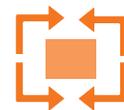

Navigate with Ease

Quickly locate your assets and crossings, accurately record their GPS coordinates, and receive directions to each location.
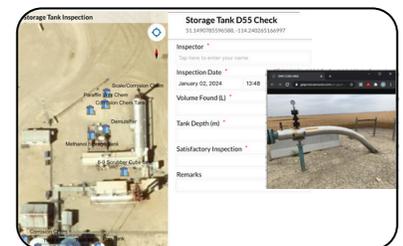

Customized Workflows

Access and prioritize workflows for pigging, valves, water crossings, signage, wellsite equipment, riser inspections and more.

Capture and Share

Capture and store photos and field notes in real time. Customize inspection and activity forms to fit your needs.

FINDpro automatically stores and verifies digital documents in the cloud ensuring easy access and sharing across your entire organization.

OR

Not quite ready for FINDpro? FIND+ is a completely free web -app offering the core functionalities of FINDpro.

Available on the app store. Access your data through any device, at any time. Available online using data or wifi including one-touch data sync while offline.

Work Smarter

Paper Maps Plot your route on a paper map of assets and compare with local maps	**GIS Mapping** View color-coded assets on a GIS map and proceed with GPS route guidance.
Manual Data Entry Fax information back to the office to be consolidated, then manually prioritize follow up and work orders.	**Real-Time** Locate the asset to within one meter, complete the customizable activity forms, attach images and upload to the cloud.
Paper Documents Search for the asset on location and perform the inspection or activity. Handwrite the data on paper, in binders.	**Digital Data Reporting** Reporting highlights assets requiring attention, sends exception alerts via email, and offers self-serve export options.
