Microsoft
Partner

The comprehensive asset management tool that provides the **insights and confidence** needed to reduce incident rates and manage **your pipeline network more effectively**.

Redefining Pipeline Integrity Management

47%

lower incident rate than industry
standard

PIRM is a powerful asset management system that connects your assets into a real-time, integrated network and transforms data into actionable intelligence to enhance pipeline integrity. Using proprietary connectivity and digital twin technology, PIRM supercharges team productivity and performance, offering multiple ways to analyze, visualize, and communicate consistently across business units. Empower your most critical decisions with complete understanding and visibility of your assets.

Precision You Can Trust

Accurate data forms the foundation of effective pipeline integrity management. PIRM ensures data reliability with advanced quality checks.

Digital Twin Powered Collaboration

Communicate consistently with a unified data estate—no more siloes, just unified teams.

Agnostic & Automatic Integration

PIRM seamlessly integrates various forms of data from different public, private, and proprietary vendors into a single platform.

See it Simplified

A built-in layered GIS mapping interface brings assets and pipeline risk to life in real time.

Relatable Industry Library

Using its Smart Schematics, PIRM hosts a unique, relatable, industry library that associates information directly back to each asset.

Designed for You

Our team of experts will help you configure PIRM for your organization.

“PIRM gives us a new level of control, enables us to maintain the system on our own, and keep costs low.”

– Field Supervisor, Mid-sized Pipeline Operator

Save time. Save money. Meet compliance.

Make Data-Driven Decisions | Features and Benefits

01

Fully Automated Risk Assessment

For every 25 metres of pipeline, evaluate multi-dimensional consequence and probability analysis. Risk factors are customizable by company threshold.

02

Comprehensive Dashboard

Review process conditions such as flow, chemistry, topography, temperature, and pressure. Access and explore schematic maps, data analysis and reports on a simple interface.

03

Risk Mitigation

PIRM comes with an automated risk notification system with mitigation recommendations, so you can focus on critical tasks and reduce your incident probability.

04

Geo-hazards Notifications

WildFire and HydroFlow offer industry-unique monitoring and instant notification systems for wildfires and abnormal water flow conditions.

05

Cost Savings

Realize significant tax savings with the decommissioning module and reduce costs by monitoring line activities, vendor progress and chemical programs.

06

Efficiency

Streamline productivity with standardized audit reports and automated field and data integration, common storage, deficiency flagging, optimization, bulk reporting, etc.

PIRM integrates with popular third-party applications through APIs in the cloud, enabling easy data reporting and providing secure, scalable access anytime, anywhere.

Backed by world-class data security

Your Success is Our Success

Our partnership approach ensures outstanding service at every step. From change management and audit support to helping you get the most out of our software, we'll help you extend control and cost savings across your operation.
